Backus Hospital Training School

Graduation Exercises of Class of 1910 with Address by William A. Slater who Also I resented Class Fins-Reception at Nurses Home.

Like the exercises of preceding years, the graduation programme of the class of 1310 of the Backus hospital Training School for Nurses attracted a fashionable audience at the Osgood Memorial on Wednesday evening, filling all the seatting accommodations, and a programme of much merit was presented. During the opening selection by the gramme of much merit was presented. During the opening selection by the Harmony club, whose music was a delightful feature, the graduating class of six members entered and took their seats in the front row with Miss May L. Love, matron and superintendent of nurses. Behind them sat a number of the alummae. The following comprised the class of 1910: Miss Prudence S. Grindle, Brooksville, Me.; Miss Horacetina W. Crowley, Portland, Me.; Miss Annie L. Humphrey, Westerly, R. I.: Miss Elizabeth A. Suilivan and Miss Mary T. Dennison, Norwich; Miss Catherine B. MacKay, Waugh's River, Nova Scotia.

Mr. Williams then introduced William A. Slater for the address to the gaduating class, expressing briefly the pleasure it was to have Mr. Slater here after so long an absence from his former home. Mr. Slater spoke as follows, after the applause which greeted him subsided:

It would be difficult for you to appreciate the pleasure I experienced when Mrs. Osgood's letter came to me in Boston asking me to make this address to you tonight. It was a pleasure in more ways than one.

In the first place, I was pleased to be recognized as an old citizen of Norwich, for, although circumstances William A. Slater Speaks.

Devotion and Desire to Be Helpful. My own experience teaches me that here are nurses and nurses. There are those who, from the moment they nter the sick room, have a beneficent diately a calm confidence and tends to soothe and benefit the patient. There are others who breathe but a spirit of antagonism and who retard rather than help the pitient's recovery. Some have this soothing influence inborn in them while others have to acquire it. I know of ne way of acquiring it except by approaching each case in the spirit of devotion and with an earnest desire

When you enter upon a new case, make up your mind that it shall be your supreme effort to adjust yourself to the routine of the household so that, as far as you are concerned, there shall be no friction. Sometimes your service will be in a household where the occupants are poor or where the machinery does not run smoothly. In such cases it will be necessary to exercise self-restraint and sometimes self-sacrifice, but your calling is worthy of sacrifice, but your calling is worthy of such sacrifice.

Tact is Needed.

One of the most difficult experiences ou will have to contend with will be o work in perfect unison and good will to work in perfect unison and good will with the servants of the house, and here will come in the necessity for the exercise of a tact such as you will, perhaps, never have greater need of. The fatal thing will be to give them the impression that you feel yourself their superior. Rather make them feel that you are both, for the moment, working together for the good of your patient and that you count upon their assistance to that end. You should thus gain their respect and willing cooperation.

MUSICALE AND DANCE AT MISS BUTTS' SCHOOL Pupils Heard with Great Pleasure in Closing Event of School Year.

Much Depends on the Nurse.

I hore you one and all, have a due appreciation of the nobility of the career which you have chosen and the possibilities that are before you if you tilme has come when the medical profession, if it is honeat, acknowledges that the healing of a patient is often quite as much in the hands of the trained nurse as in its own. This is, however, only true if the nurse follows conscientiously the doctor's directions. If this is done as a first requisite, she has it then in her power to supplement the doctor's efforts to an extent that is being appreciated more and more every day.

I trust that you will not think that I have been pedantic in giving you so much more advice than I intended to it have seen nurses who had all the good requisites that I have urged you to cultivate, but I have also seen others who were lacking in most of them. I would like to see the class that is graduating this year the best that has gover gone out from the training school of the W. W. Backus hospital, and that is why I have allowed myself to warm up to my subject so that, perhaps, I have exhausted your patience. There only remains to wish you for all assembled here the sincerest best wishes for your success and happiness in the vocation you have chosen.

Mr. Slater's address was followed by two selections by the choir of the Second Congregational church of New London, Eben Learned director. They had contributed their services for the vening and were received with enthusiasm and insistent calls for encores for their numbers, sung with admirable for the programme.

Garnsey—Moszkowski's From Foreign Lands—Germany, was a pretty composition. Miss Cranska gave Chopin's Ballade in A flat major with skill and Miss Swift was much applauded for her rendering of Paderewski's Cracovienne Fantastique.

The closing selection, Debussy's Gold Fish was given by Mr. Swift himself, who thus followed up the efforts of his pupils and made a masterly finish to the programme.

After the musical the rooms were cleared for dancing, which was enjoyed by the young people until 12.

Miller's orchestra furnished music for twenty numbers.
